City Drought Restrictions Lifted Effective January 22

Granbury, Texas – Water supply and demand conditions in the City of Granbury have improved to a level that the City can remove all drought restrictions. Effective January 22, 2019, the City of Granbury will deactivate Stage 2 drought restrictions and will proceed with no drought restrictions in place.

However, the City always recommends that customers practice conservative water use.

- All City water customers can use MyUsage, an online utility customer portal that gives Granbury water utility customers the ability to track their daily water usage. To access the portal, customers simply need to activate their free account at www.granbury.org/myusage.
- Learn more about water ways to conserve water usage every day at takecareoftexas.org.

For more information about City of Granbury drought restrictions, visit www.granbury.org/drought or call the Department of Public Works office at (817) 573-7030.
